

# World Ocean Day Tips

## Participate In & Organize Beach Cleanups

---

Who doesn't love a day at the beach? On your next trip, take some reusable bags and friends to spend a sunny day cleaning up the beach.

## Use Eco-Friendly Products

---

Before purchasing a product or appliance, check the label to make sure it is eco-friendly, and made of organic and all-natural ingredients.

## Promote Coastal Tourism

---

For your next holiday, make sure your destination promotes ecotourism and sustainable travel. Visit locations that are in a fragile state and rely on ecotourism to help boost their economy.

## Reduce Water & Energy Use At Home

---

Fossil fuels and burning carbon dioxide cause a tremendous amount of water pollution. Ride bicycles, use public transportation, walk, sail, and turn off appliances when you aren't using them.

## Support Marine Protection Foundations & Organisations

---

Many philanthropies and organizations are dedicated to preserving and protecting our blue waters. Donate, read and learn.
